

Karuselli Lounge Chair

Design: Yrjö Kukkapuro, 1964

SUSTAINABILITY

Artek products are manufactured in series. The nature of its products, however, and the materials it uses stand opposed to purely mechanical and fully automated processing. Combining modern production methods with expert handcraftsmanship, Artek furniture is manufactured in keeping with the original vision of Alvar Aalto.

Regional sourcing, sustainability, and safety are pursued without compromise, both by Artek and its partners, ensuring ethical manufacture and design of the highest quality. Knowing how products are made where raw materials are sourced, and the ethical and environmental impacts involved, is part and parcel of responsible consumerism. Artek aims to be completely transparent, and its products – built to endure, easy to adjust or adapt – are more relevant than ever.

Environmentally responsible, safety orientated, and made to last, Artek furniture, lighting, and accessories are continuously and thoroughly tested so that the Artek name guarantees not only design excellence, but highest quality. Regardless of whether an item or component is produced at Artek's factory in Finland or by one of the company's carefully selected partners, rigorous standards are met.

Karuselli Lounge Chair

Design: Yrjö Kukkapuro, 1964

MATERIALS

FIBERGLASS REINFORCED

Due to its durability and mouldability, fiberglass reinforced plastic has been used for the foot support and the seat shell of Karuselli Lounge Chair. Fiberglass resists both compressive and tensile forces very well and is therefore designed, tested and built to last for decades.

STEEL

is a stable compound of iron and carbon with various added alloys. For the metal support of the Karuselli Lounge Chair, spring steel has been used due to its resistance to fatigue, inherent strength and longevity.

LEATHER

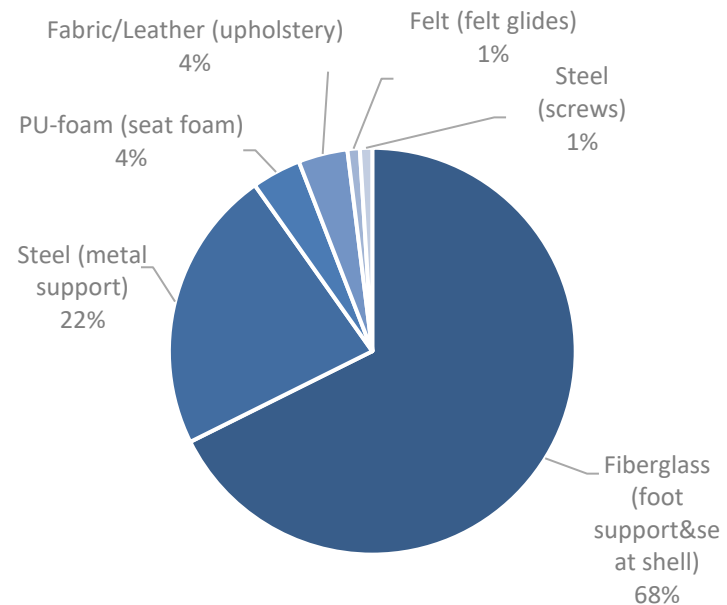

Karuselli Lounge Chair is available in high quality leather. Artek leather options are inspected to above average high quality standards and are therefore particularly durable.

RECYCLABILITY

At the end of the product life cycle, steel components can be melted down and completely recycled. Also the recyclability of the packaging used for Karuselli Lounge Chair is close to 100% since mainly corrugated cardboard plus PE-foil is used.

PACKAGING

The Karuselli Lounge Chair comes in a corrugated cardboard box and PE foil.
